

## Minutes on water bodies meeting

**Date : 19.12.06**

**Venue : NCRC Roof Hall, Nagapattinam**

**Time : 10.00 am**

In the morning session the data collectors filled their format. If information unfilled area identification, any correction checked by Mr.Pandian. and new format fillings through clarification of team leader.

Review:

Sl.No	Taluk	No of sample villages	Other water bodies	Village profile	Time line
1	Vedaranyam	10	8	6	-
2	Kilvelur	9	8	5	1
3	Nagapattinam	8	5	5	1
4	Tharangambadi	5	5	5	1
5	Sirkali	6	3	3	-
	Total	38	29	24	3

Kudumbam one village and CCD two villages still not visited.

### **Video shooting discussion:**

The next coming weeks we are shooting video clipping the problems affected spots identification. So that given a list check list for choosing the problematic places

1. TER location problematic places like big and small TER
2. Channels important parts of A.B.C.D parts
3. Drainage like main drain and sub drain
4. Major drainage in Buckingham canal and Vedaranyam canal
5. Straight
6. Crop like good field and bad field
7. Damages visual spots like masonry work and check dams

8. Other water bodies

Village pond

Farm pond / temple pond

Tank irrigation

Open wells / bore wells/ skimming wells

9. Allam storage structures

10. Sand dune

11. Sand ridges

12. Sand dretches

13. Horticulture crops

**Target fixing:**

Tentatively coming Saturday is lost date for filling all the formats. And also finish taluk geographical area information collection with in the study area including village ponds and farm ponds details.

**Format submission:**

As on the date the data collectors submit their filled format details.
