

# NGO Coordination and Resource Centre Nagapattinam, Tamil Nadu, India

*(An initiative SIFFS, SNEHA and UNDP supported by District Administration, Nagapattinam)*

## Snapshot of Damages Due to Tsunami: Village-wise in Nagapattinam District

**Room No: 313, District Collectorate, Nagapattinam Ph: 04365 252547**

**No: 31, South Palpannaichery, Mahalakshmi Nagar, Nagapattinam  
Ph: 04365 252618/ 252681 Email: [info.ncrc@gmail.com](mailto:info.ncrc@gmail.com) Web: [www.ncrc.in](http://www.ncrc.in)**

### *About NGO Coordination and Resource Centre, Nagapattinam*

*The NGO Coordination and Resource Centre (NCRC) is an institutional mechanism for regular, coordinated and transparent interaction between the Government Departments, NGOs and the communities affected by the Tsunami in Nagapattinam District. NCRC has been functioning since 01 Jan 2005, as the NGO Coordination Centre and was focussed on trying to coordinate the relief efforts as best as possible. During the relief phase the Centre was run by numerous volunteers from all over the country and even from abroad.*

*In the current rehabilitation phase, NCRC aims to support the different stakeholders by:*

- researching and building up a knowledge base around issues and sectors relating to rehabilitation*
- providing technical expertise to facilitate the development of sectoral and regional perspectives*
- collecting reliable relevant data and making this easily available to all stakeholders*
- contributing to appropriate and relevant policy formulations*
- Facilitating community participation in the decision making process so that the community perspective is clearly articulated.*

*The NCRC is now run by a team of competent professionals and it seeks ensure that the needs of the tsunami affected communities are met through a rehabilitation process that is effective and sustainable.*

#### **Disclaimer**

The pages in this document aim to provide general information about the topics they present. They are not intended to make statements concerning the official policies and practices of persons and institutions unless stated otherwise. A considerable effort has been made in good faith to ensure that material accessible from this document is accurate. Despite this effort, we understand that errors are inevitable.

Consequently no guarantees are expressed or implied as to the accuracy, timeliness, currency or completeness of any information authored by persons at or agents of NCRC or accessible from any references that may be made in the document. Nor is any warranty made that the information obtained from this document are that of an affiliate is valuable or useful for any purpose. A reader assumes full responsibility for any actions taken based on any information out of this document.

The use of information found on this document, of mail addresses, email addresses or phone and fax numbers is not permitted for any commercial purposes.

## Foreword

Dr. J. Radhakrishnan, I.A.S.  
The District Collector  
Nagapattinam

Nagapattinam is the worst affected district due to Tsunami, with damages in over 80 villages. The loss to life was estimated at 6,065 and there were many other damages such as houses, fishing boats, gears, standing crops, agricultural lands, household assets, livestock, etc. The responses to the relief and rehabilitation of affected communities and areas have been highly effective, with government and civil societies working closely. There have been ongoing consultations with affected communities, civil society, experts and others relevant to the issue. The NGO Coordination and Resource Centre has been performing an effective role of coordinating these efforts across various agencies.

As a part of its ongoing efforts, the NCRC, with support from various agencies has come out with this publication – ‘Snapshot of Damages due to Tsunami: Village-wise in Nagapattinam District’. This document provides a brief overview of damages village-wise, which will help communities, agencies working in this area and the government to obtain a quick and brief understanding of the situation and plan their activities.

I am sure that these efforts to bring-out publications by NCRC will improve the effectiveness of rehabilitation in addressing the needs and priorities of communities affected by Tsunami in the District.

-Sd  
Dr. J. Radhakrishnan

## Foreword

Ranvir Prasad, I.A.S.  
The Additional Collector (Relief and Rehabilitation)  
Nagapattinam

The relief and rehabilitation of Tsunami affected areas in Nagapattinam District has been a well coordinated effort, with various agencies and individuals coming together and working closely with District administration. The NGO Coordination and Resource Centre is an institutional mechanism promoted in this district to provide an effective platform for dialogue, negotiations and consultations between the Government, civil society and affected communities in the district.

The NGO Coordination and Resource Centre, as a part of its ongoing efforts, to share information, has come out with this document which provides a snapshot of damages and compensation in the Tsunami affected areas. This document can be used as a ready reckoner to get a quick overview of damages village-wise.

I am sure that the document will be very useful for various agencies and individuals working on the relief and rehabilitation in the District. These efforts towards presentation of information in a manner which can be utilized easily, will improve the coordination and effectiveness of various efforts taken up in the district.

-Sd  
Ranvir Prasad

## About the document

This document is part of a series of information packs that NCRC is bringing out for the benefit of all stakeholders and the general public with regard to the tsunami affected areas of Nagapattinam district. Information is vital for both operations as well as policy making. In the case of the media and general public, information is useful to analyse and understand the performance of the different actors involved in the relief and rehabilitation. Ultimately, it is public opinion, local, national and international, that is the best corrective for any problem and also the basis for better management of disasters in the future.

### *Data gaps and limitations*

When NCRC tried to put together the simplest bits of information about the tsunami disaster like the list of affected villages, their populations, the extent of damages and the compensation packages given by the Government, etc., we realised that such information was not simple at all. Information and data lying with various Government departments and agencies are quite difficult to reconcile and one can get lost analysing the data in the absence of adequate definitions or explanations for the various terms and categories. Here are some of the problems we ran into:

- There are many village lists and the number of affected villages depend on which list one went by
- While the concept of a revenue village is useful for various administrative purposes, it becomes an opaque category for most as it does not coincide with a traditional village or hamlet that people actually identify themselves with.
- All traditional fishing “villages” have their own traditional self governing “Panchayat” system and it is somewhat easy at field level to collect information about such villages. The fisheries department has a list of fishing villages and has even a detailed census of the fisher folk and their craft and gear conducted last in 2000. However, even in the department list, the traditional villages are occasionally broken up into smaller units (streets or localities) for administrative convenience and are not easy to identify.
- Since different lists are used for different purposes by different departments, the correlation between different lists is difficult to make. The figures for those dead in the tsunami are available mostly at the level of hamlets, while the population figures are available only at the level of revenue village. Hence it is not possible to compare population and deaths using the same list of villages. Similar is the problem with all figures for damages due to tsunami.
- The absence of a proper list of fishing equipment owned by fishermen, pre-tsunami, has made the assessment of damages and the award of compensations extremely difficult. Lists made post-tsunami have not been reliable and administrators have had to adopt various strategies (not always satisfactory) to find out deserving candidates for award of compensations for loss of fishing equipment.
- While the presence of strong traditional panchayats among the fisher folk helped the Government assess various damages, in the case of agricultural communities, this proved to be much more difficult. Data on those who lost their livelihoods is extremely difficult to come by with respect to all non fishing occupations.

Though the Tamil Nadu Government has distinguished itself by excellent disaster management, it is clear that *good governance in a post disaster situation is inadequate and cannot overcome all the chronic problems that existed prior to the disaster*. Information systems and proper data bases have to be in place to ensure that all operations in the post disaster situation are properly planned and executed. *A proper data base on all citizens is essential for proper governance, especially in a disaster situation.*

### *The Village Snapshot*

However, despite various limitations with the data, many stakeholders are keen to access information that is relevant to the rehabilitation work that is in progress. Collating all available information and making it available in a user friendly form is an important task of NCRC. From the early days of relief and rehabilitation village wise information has been in demand from various stakeholders as many interventions are aimed at particular villages. Hence we have prepared this *Village Snapshot* document putting together all official information available about the population, deaths, losses and compensation distributed for the affected villages in Nagapattinam district.

The sources of information are:

- Tsunami Relief Section, District Collectorate, Nagapattinam
- Joint Director –Department of Fisheries, Nagapattinam
- Joint Director –Department of Agriculture, Nagapattinam

Different agencies in the district are in the process of collecting data on the background of each village affected by the Tsunami that struck the coast on 26<sup>th</sup> December 2004 and the relief and rehabilitation activities being taken up. In the meantime this document is being published and is deliberately kept brief to provide an overview of the damages caused due to Tsunami and relief packages as per the available government data.

The follow up to this publication would be detailed a village profile containing the following:

- Demography profile of the village – history of the village, pre-tsunami population, socio-economic profile, livelihood (fishing and non-fishing), infrastructure facilities etc
- Damages due to tsunami – Sector wise

We shall also be bringing updates on the following:

- Relief update
- Rehabilitation update
- Agencies working on relief and rehabilitation
- Emerging issues and Community Needs
- Studies and summary of findings by various agencies

The next update on village profile is expected around end-June 2005. We invite your feedback and suggestions to improve the quality and usefulness of these documents.
